

Aerobic & Anaerobic bacteria

100% Natural Product

Eco-Friendly Product

BENEFICIAL BACTERIA POWDER SOLUTION

Sustains effective water treatment over an extended period.

Proven results in eliminating ammonia, nitrates, phosphorus, organic matter, & odours.

Effectively reduces sludge by decomposing waste through biofloc formation.

Safe for all aquatic life, even at higher doses, to support a healthy aquatic ecosystem.

PurePond

50g TREATS UPTO 4,000L

READ SAFETY DIRECTION

PurePond Powder Bacteria is formulated with a specialised blend of natural, indigenous beneficial bacteria engineered to effectively degrade sludge, surface sediment and organic debris accumulated at the pond's bottom, significantly reducing the need for frequent filter maintenance.

How It Works:

- Rapidly sinks to the bottom of the pond upon application.
- Targets and removes substrate pollutants, purifying the water.
- Converts absorbed pollutants (ammonia, nitrates, phosphates, hydrocarbons) into nutrients to promote microbial growth.
- Promotes continuous microbial reproduction, ensuring long-term water clarity and a healthy environment.

Apply evenly over the pond surface or pond filters for best results. Temporarily turn off the UV when introducing the product. Avoid use with chemical treatments. 50g can treat up to 4,000L water (Double or triple the dosage for heavily polluted water).

Tip: PurePond Powder product should ideally be used in conjunction with PurePond (liquid product) to eliminates microscopic suspended particles and organic pollutants in the water.

Safety: Avoid eye contact. If product gets into eyes, rinse immediately with water. Not for human consumption. Keep out of the reach of children.

Improper use or deviations from the recommended application guidelines as well as changes in water conditions may harm aquatic life. BBA Biosolution is not liable for such losses.
