

Enhanced bacteria

100% Natural Product

Ecological remediation to degrade tannins naturally

Specific selected bacteria strains that effectively degrade tannins.

Proven results in eliminating ammonia, nitrites.

Safe for pets and aquatic life.

READ SAFETY DIRECTION

PurePond Tannins Clear is a natural microbial solution specifically formulated to break down tannins in water bodies. It contains a carefully selected blend of beneficial bacteria with tannase enzyme activity, which effectively degrades tannins, enhancing water clarity and promoting organic matter decomposition.

Directions of Use: Shake well before use. Avoid use with chemical treatments, UV, or ozone.

Suggested Dose Rate:

- **First - time use:** 25mL per 1,000L water. (Double or triple the dosage for heavily polluted water).
- **Regular maintenance:** Add 15mL per 1,000L of water weekly.

The above dose rate is a guideline that may need to be increased or decreased according to individual conditions, such as water pollution level, water body size and depth, algae density, water temperature, volume of suspended material etc. More accurate dose rates can be established by onsite testing.

Safety: Avoid eye contact. If product gets into eyes, rinse immediately with water. Not for human consumption. Keep out of the reach of children.

Improper use or deviations from the recommended application guidelines as well as changes in water conditions may harm aquatic life. BBA Biosolution is not liable for such losses.
